LIFELONG RESEARCH OBJECTIVE

My lifelong research objective is to make AI something that everyone can use easily and well. I believe this requires more than building applications on top of existing models: it requires understanding AI at its most fundamental level. Accordingly, I aim to study the fundamental principles of how models work and to carry those insights all the way through to real-world applications, so that advances in our understanding of AI translate directly into technology that anyone can benefit from.

RESEARCH INTERESTS

My research interest centers on improving the actual performance of models through model interpretability. Rather than treating interpretability as an end in itself, I view it as a practical tool for making models better: by understanding how models internally represent knowledge and why they succeed or fail on specific tasks, we can diagnose the sources of performance bottlenecks and design targeted improvements instead of relying on trial and error. I am also interested in investigating and reducing the intent gap—the gaps that arise between what users intend, what models produce, and what actually happens inside models. By identifying and narrowing the gaps at each of these interfaces, I aim to make AI systems easier for anyone to use as intended. To this end, I focus on analyzing the internal mechanisms and behaviors of Large Language Models, and on leveraging these insights to guide training, inference, and model design toward models that are more capable, reliable, and efficient in real-world use.

EDUCATION

- **Soongsil University** Sep. 2026 – Aug. 2028 (Expected)
M.S in School of Software (advisor: Chanjun Park)
- **Soongsil University** Mar. 2020 – Aug. 2026
B.S in School of Software

WORK EXPERIENCE

- **Soongsil University NLP Lab** [Nov. 2025 – Aug. 2026]
Undergraduate Researcher (advisor: Chanjun Park)

PUBLICATIONS

*Equal contribution: **, *Corresponding author: †*

RESEARCH PROJECTS

Soongsil University

- 2026년 인공지능 말뭉치 운영 및 연계 행사 개최 (2026, 참여연구자 (용역과제), National Institute of the Korean Language)
- 2026년 인공지능의 한국어 능력 표준 평가 과제 구축 및 활용 (2026, 참여연구자 (용역과제), National Institute of the Korean Language)
- 우수연구 신진연구 (유형B) (2026-2029, 참여연구자 (3책5공), NRF)
- Foundation Model 운용과정에서 민감정보 추론 방지 및 리스크 평가 기술 개발 (2026-2028, 참여연구자 (3책5공), Korea Internet & Security Agency (한국인터넷진흥원))
- 토론과 소통으로 지식을 연결하는 AI 에이전트 기술 개발 (2026-2028, 참여연구자 (3책5공), Korea Creative Content Agency(한국콘텐츠진흥원))
- AI 보안 특화 'AI 에이전트' 개발 선행 연구 (2026, 참여연구자 (용역과제), 한국정보보호학회 산하 AI보안연구회)
- 국가·공공기관 가이드라인 준수를 위한 AI 시스템 보안 위협 자동화 기술점검 도구 개발 (2026, 공동참여연구자 (위탁), KIST)
- AI 연구용 컴퓨팅 지원 프로젝트 (파라미터 수준의 정보 제어 원천기술 연구 및 파라미터 스튜디오 플랫폼 개발) (2026, 참여연구자, KETI)

EXTERNAL ACTIVITIES

Soongsil University

- Database, Teaching Assistant (Spring 2026)

AWARDS/FELLOWSHIPS

Awards

- President's Award, Soongsil University Software Competition (2021)
- Excellence Award, SW Talent Festival (2021)

Fellowships

- Graduate Admission Scholarship for Academic Excellence, Soongsil University (2026-2028)
- Research Assistantship (RA) Scholarship, Soongsil University (2026)

Research Grants

- VESSL AI GPU Grant Program (2026)

PATENTS

TALKS

Domestic Talks

- MISOTECH, Foundation Models: Basics and Practice, June 2026
